

# NOBODY KNOWS TIA

**TIA** i.e. **mini-stroke** is not the nice next door girl. Still you better familiarize yourself with its symptoms.

**When TIA occurs, please call 112 immediately.**

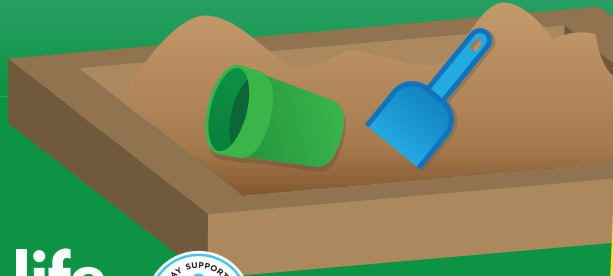

ONEONETWO

Call 112

# DO NOT PLAY WITH TIA

The symptoms of TIA (Transient Ischemic Attack) are the same as in the case of stroke, but they last only for a short time. Even if the symptoms pass, seek immediate medical attention. After TIA many will have a stroke, half of them already within the next 24 hours.

**So do not wait, please call 112 immediately!**

## Recognise TIA:

- Speech becomes slurred or words are not found.
- One angle of the mouth droops.
- An arm, leg or both on one side go weak or numb.
- Visual disturbances.

**One life**  
Enjoy every day.
